

Fit for Life

Cardio® Pacer

- User-friendly and functional monitor (LCD monochrome).
- A total of 12 programs available for motivating training: adjustments possible by means of the "scaling" function.
- Home trainer ergometer starting from the Pacer model and higher. An ergometer is a traditional piece of fitness equipment that very accurately measures the results of your training. Information in Watts.
- The magnetic brake is simple to operate from the monitor. Practical, easy-to-use and noiseless.
- Wireless heart rate chest strap available as an accessory.
